The Right Team and Technology Can Make Anything Possible

Our Tools for Success

We start with a review to help you find the gaps in your processes and systems. We then deliver a document detailing how those gaps are truly impacting your business and provide process changes and systems requirements necessary for a successful implementation. We find that using our processes and proven software technology allows for greater overall efficiencies, lower total cost of ownership, and most importantly, a successful project implementation.

ERP Dashboards

Dashboards easily connects your data, wherever it originates. Vantage Dashboard Integrator – our data blending solution – gives you the ability to consolidate data from multiple locations in diverse formats, and transform it into a useful data set without the need for programming. Vantage IT Dashboards can handle data from a multitude of sources. One of our representatives can assist you with a custom solution that's right for your organization

ERP Mobile Integration

Mobile integration solutions let you deliver a great mobile experience using mobile device capabilities (location, camera, contacts, others) and contextual real-time access to backend information. The combination lets you build apps for improving the productivity of your knowledge workers and the interactions you have with customers. Based on the processes and information stored in your systems – and a great user interface design – your apps will be truly differentiating

ERP Change Management

We partner with clients to design and implement their change strategies and actions and facilitate the quick realization of their business objectives. We provide the systematic architecture for leading and managing change based on scientific organizational change management principles, and we build a client's capabilities to lead and manage change in both the short- and long-term
